3M™ Hookit™ Trizact™ Clear Coat Sanding Disc

Scratch free sanding

for the

perfect surface finish

3M™ Hookit™ Trizact™ Clear Coat Sanding Disc

To help bodyshops achieve speedy paint rectification, 3M has added a P1500 version to its Hookit™ Trizact™ Abrasive Discs.

Sanding large areas with a traditional P1500 disc can risk creating deep scratches that are tough and time consuming to polish out.

This unique product, using proven technology, has been specially developed to enable the rapid rectification of common paint defects such as orange peel and nibs. The consistent, controlled cut results in a smoother finish.

- Specially developed for quick nib and orange peel removal
- Smooth, non scratch finish for easier polishing
- Abrasive has pyramid construction for longer life and even cut
- Used damp for less dust and loading

3M™ Hookit™ Trizact™ Clear Coat Sanding Disc

Using the new Hookit™ Trizact™ Clear Coat Sanding Disc helps the bodyshop achieve the perfect finish in record time.

Specially designed to solve paint defects such as nibs and orange peel, the unique pyramid construction of the Trizact™ Abrasive Material guarantees even wear and long life.

As the abrasive is used, fresh, sharp minerals are continuously exposed, resulting in a consistently fine keying depth throughout the sanding operation, no matter how large the area.

Used damp, the Hookit™ Trizact™ Clear Coat Sanding Disc reduces dust production and premature loading.

Sanding with the P1500 disc should be followed by the 3M™ Hookit™ Trizact™ P3000 Sanding Disc, then finished by polishing using the 3M™ Perfect-it™ III Colour Coded Paint Rectification System.

The new Trizact discs are available in 75 & 150mm diameter

Part No.	Product	Pack size	Size
05600	3M™ Hookit™ Trizact™ Clear Coat Sanding Disc P1500	25 discs per box 4 boxes per case	150mm
